

Chatsworth International School Haze Policy

Chatsworth follows the advice given by the National Environment Agency (NEA) with regards to the Pollutants Standards Index (PSI) in order to adjust our school programmes accordingly during haze conditions.

The 24 hour PSI readings and the 1-hour PM2.5 readings, as reported on the NEA website, are used to make adjustments for school programmes. Chatsworth uses the NEA readings as these are developed for Singapore where other sites report based on other country indexes. More information can be found on the NEA website.

The below chart shows the readings where changes occur, as well as what changes take place in each area of the school. The changes in programmes also align with the Singapore international school sporting association, ACSIS.

*The school reserves the right to adjust programmes at any time, without prior notice.

Chatsworth International School Haze Conditions PM 2.5 Daily Planning 2026

NEA - PM 2.5 Readings	Health Concerns	CCA/ECA Programme	School Events/Evenings	Field Trips / Outdoor Education	Transportation	Canteen Services/Meals	Staff	Communication	NEA Guidelines (as at 09.06.26)
